Word Play: I Spy Homophones!

Remember, homophones are two (or sometimes more) words that **sound** the **same** but have **different spellings** and/or **meanings**.

Example: knew and new

- I knew the answer to her question.
- These are my <u>new pencils</u>.

Where in the module texts do you spy more homophone words? Collect as many as you can on this page.

new/knew		
	<u>'</u>
